

TRAN ANH DUC

06/04/2003 | Ha Noi, Viet Nam

Email: ducta2337@gmail.com | Github: andhuc | Phone : 0918 478 364

SKILL

- **Programming languages:** Java, JavaScript, C#
- **Frameworks:** Spring boot, Express.js, ASP .NET, ReactJs

Other tools: Git, SQL, Postman

PERSONAL PROJECT

Full Stack Developer | Technical Leader

(Team 5 member)

Student Project Portal

Sept 2023 – Nov 2023

- **Descriptions:** This is a system using Java spring boot with 4 roles (admin, subject manager, class manager, student). It allows end-users to manage project works with other members in a group, manage systems like class, subject and more.
- **Responsibilities:** I am responsible for system architecture design, basic CRUD operations and the implementation of technology. I also handle other tasks, such as developing a Node.js server for real-time chat functionality with Socket.IO and tech support for other members.
- **Tech stack:** Spring boot, MySQL, Express.js, MongoDB.
- **Source code:** <https://github.com/andhuc/StudentProjectPortal>
- **Live demo:** <https://student-project-portal.ngominhduc24.tech>

Audio Market

Sept 2023 – Nov 2023

- **Descriptions:** This website is a platform that allows users to upload, stream audio, buy and sell audio licenses. Sellers can easily manage their own audio on the platform, while users can find audio they like and make an order with the owner.
- **Responsibilities:** I am responsible for system architecture, database, UI design and develop 70% source code of a project. I handle tasks beyond that such as project work management and tech support for other members.
- **Tech stack:** ASP .NET MVC, SQL Server.
- **Source code:** <https://github.com/andhuc/AudioMarket>

Full Stack Developer | Owner

(Personal project)

Chat App

July 2023 – Aug2023

- **Descriptions:** This project allows users to chat in public box chat, private box chat and also chatting one to one with any one. This project uses websocket to handle real-time communication between server and client.
- **Tech stack:** NodeJs, Express.js, MongoDB, Socket.io.
- **Source code:** https://github.com/andhuc/chat_app
- **Live demo:** <https://aduc-chatapp.onrender.com/>

AWARDS

- Second prize in the algorithm competition of Ha Tinh province.
- Third prize in the developing software competition of Ha Tinh province.

EDUCATION

FPT University

Oct 2021 – Apr 2025

- GPA: 8.0
- Major: Software Engineering
- Coursework: Database Design, Software Architecture & Design, Software Requirement, Software Testing, Full stack development with .NET
